Better meetings start with Launcher

With Launcher added to your meeting room screens, users have quick and easy access to all their calls and favorite apps – without compromising on security or locking into a single UC vendor.

DisplayNote Launcher

Launcher helps organizations thrive in the changing hybrid workplace

Shared meeting spaces, hybrid working, and video collaboration are the heart of the new way of working. But the experience can be frustrating for room users and IT admins alike, with technical difficulties, security risks, and inflexible setups.
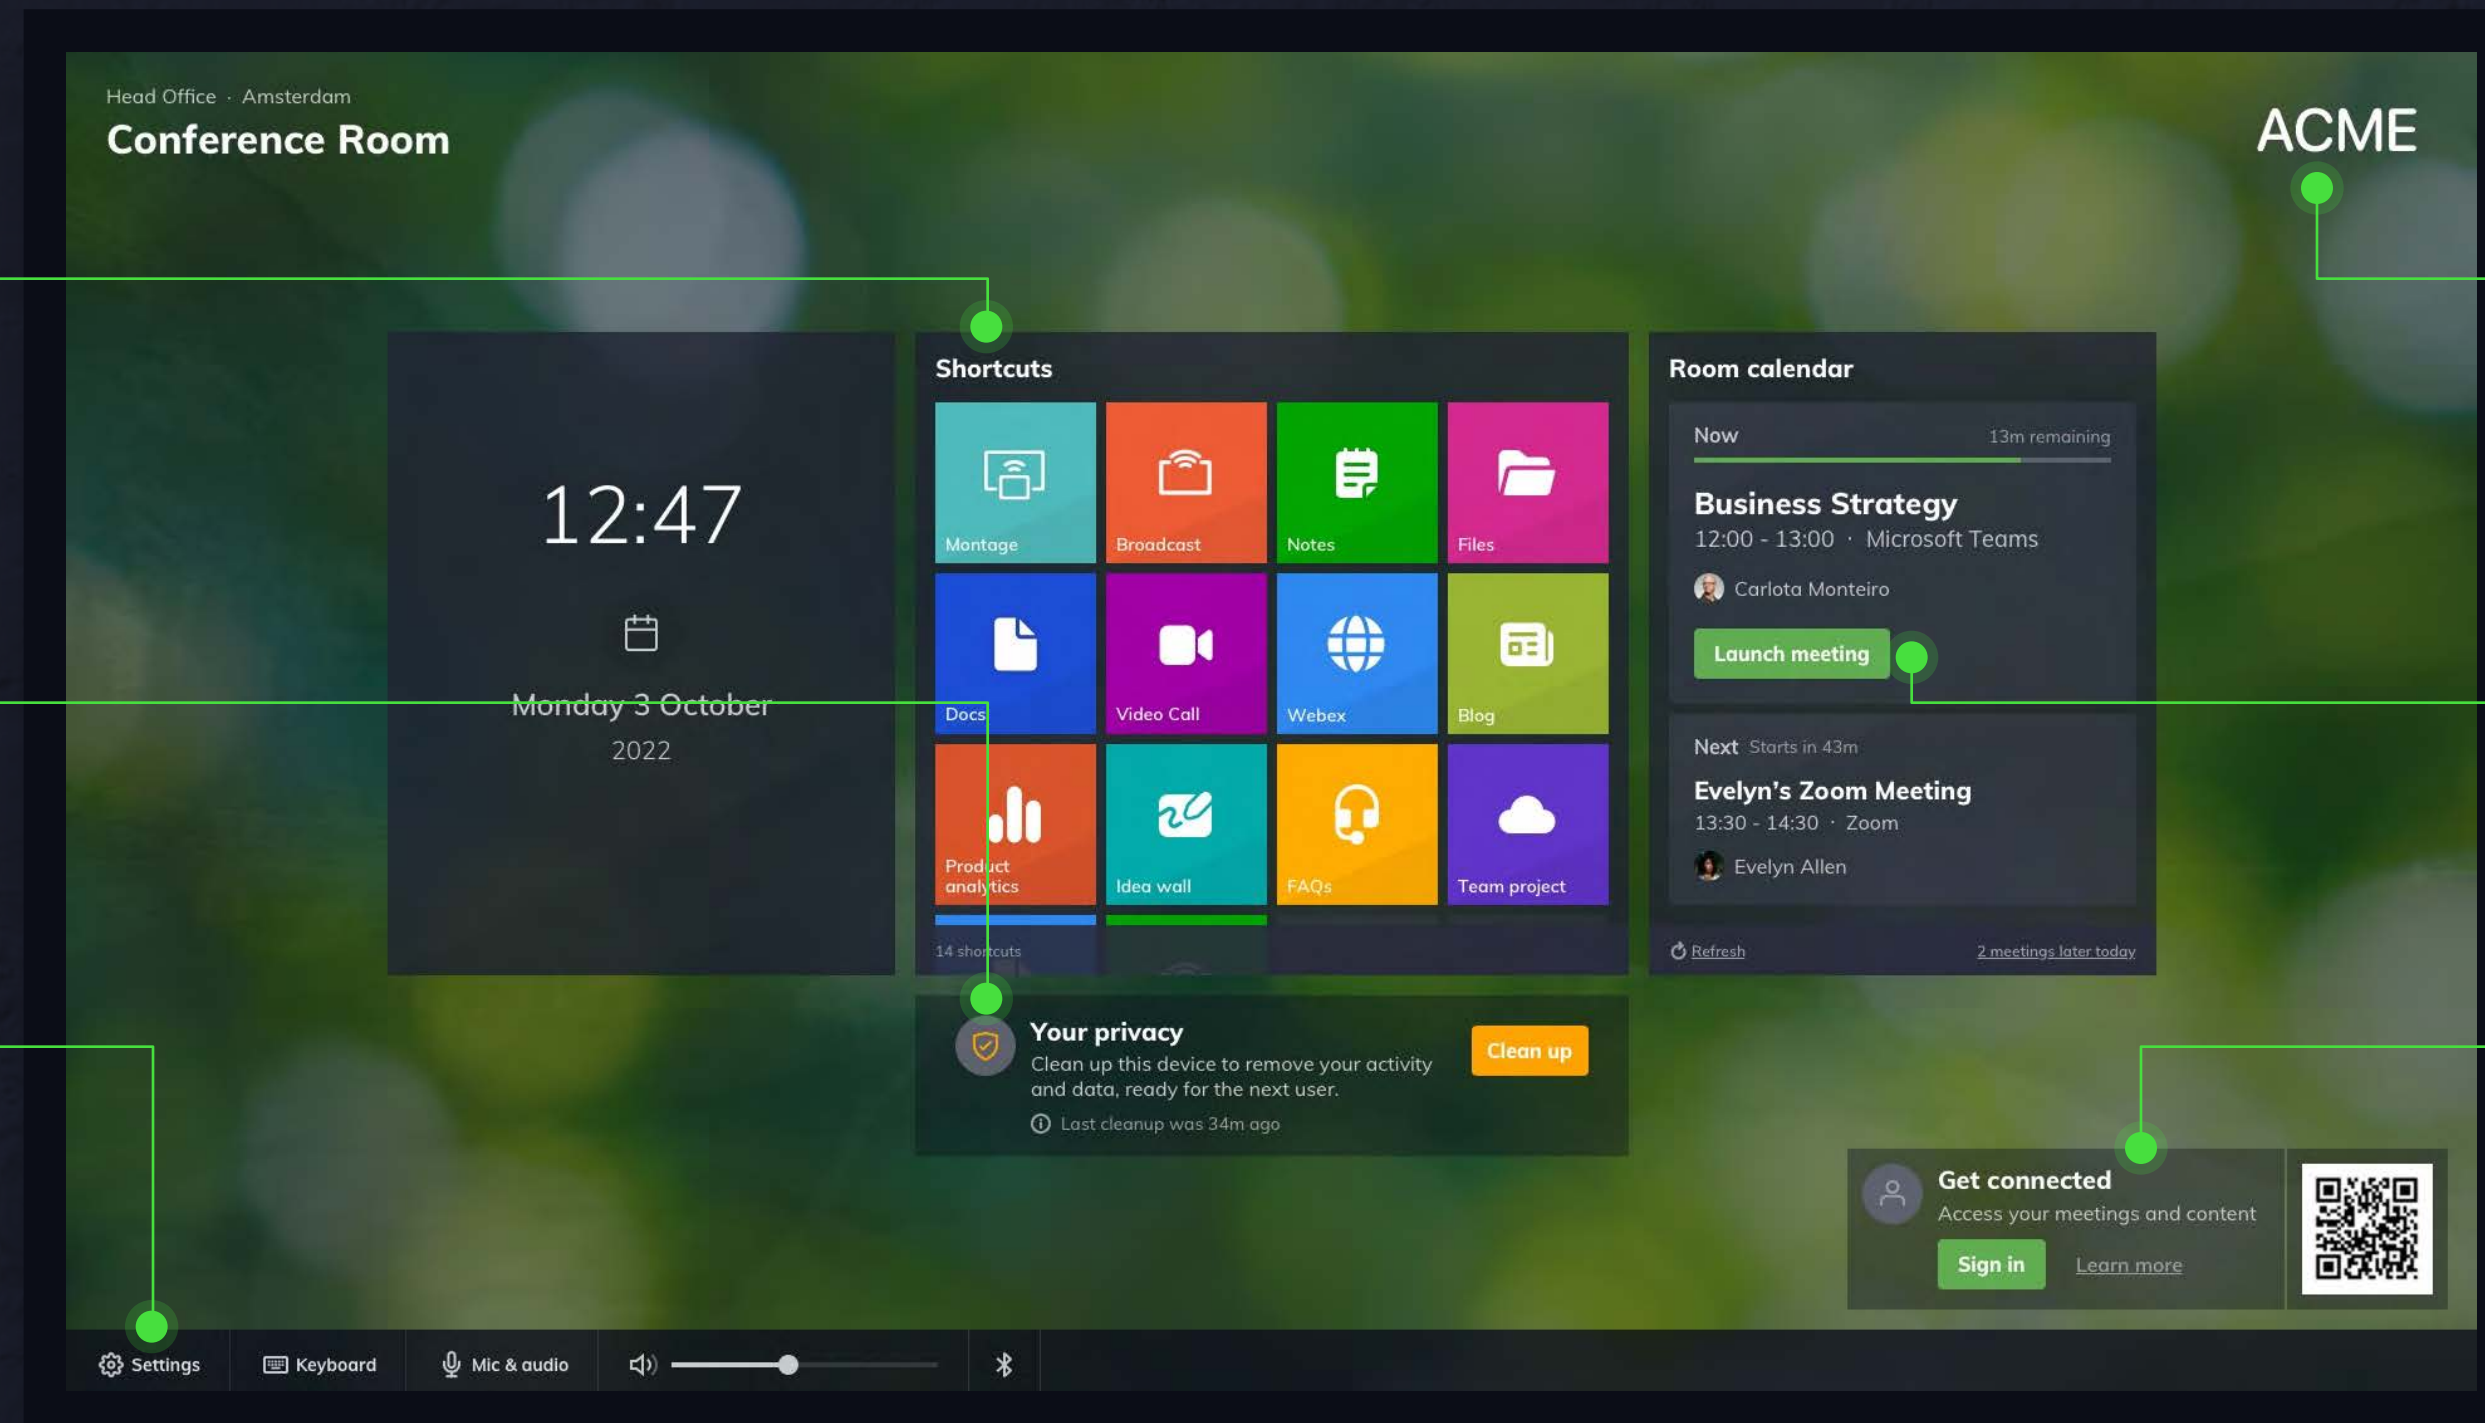

Launcher ensures your meeting spaces deliver a best-in-class user experience for all users.

As a Windows software Solution, Launcher can be added to the screens you already use, making it a cost-effective Solution.

No more vendor-locked rooms

Launcher unlocks rooms from single UC vendors, allowing users to launch calls across Microsoft Teams, Zoom, Webex, Google Meet, GoToMeeting, Lifesize, and Blue Jeans.

Simple and intuitive

The Launcher interface imitates the easy call and app launching experience users are accustomed to on their personal devices, making meeting room setup simple and low-stress.

Victorian Chamber of Commerce and Industry

Ensuring meeting room flexibility and security at Victorian Chamber of Commerce and Industry

✓ Easy call launching with different video platforms

✓ More efficient meetings with fewer help requests

✓ Hybrid-enabled rooms

"We wanted the screens to be locked down, but still give staff the option to launch calls in their video-conferencing platform of choice. Launcher is easy to use, and we don't have people coming out of meeting rooms frustrated that they can't get into meetings. It's a good solution."
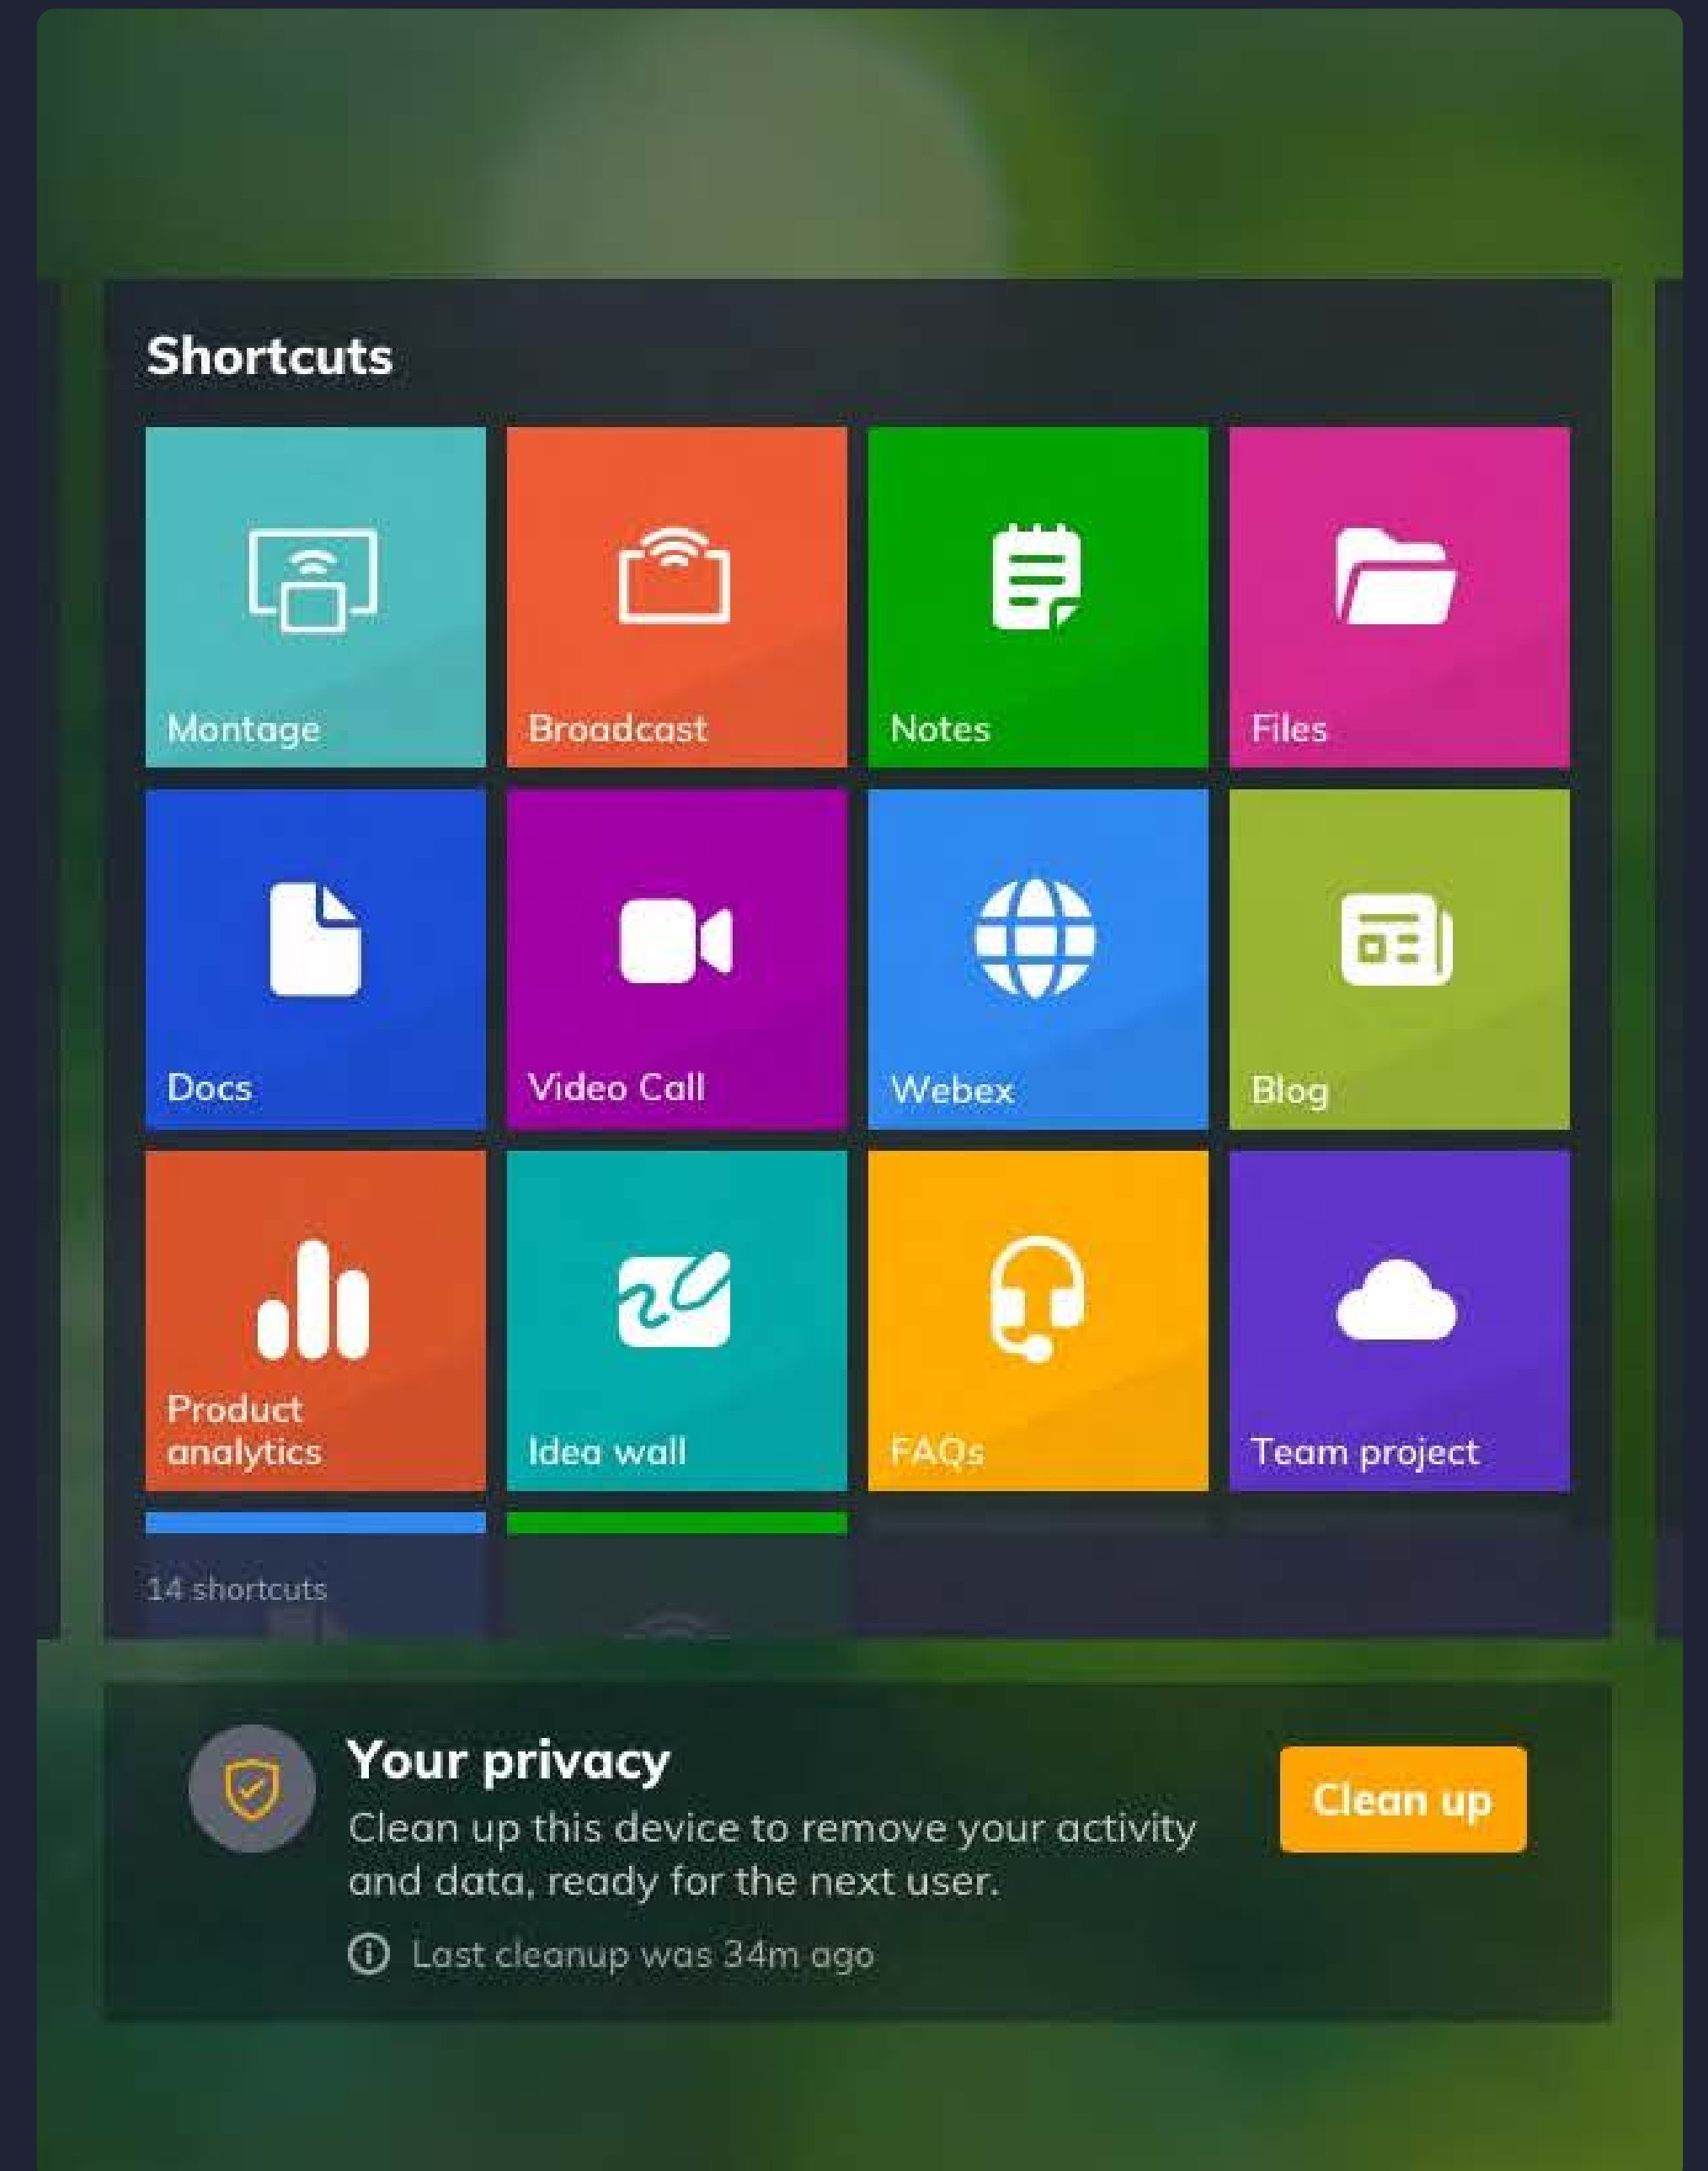

Glen Goodwin
Executive Director of IT, VCCI

Clean up

Locked down and secure interface

Kiosk Mode keeps things locked down, preventing access to the system. Plus, Custom Cleanup allows you to schedule when and what type of data is cleared between meetings.

Bishop Fleming facilitate secure hybrid meetings throughout their organization

"Launcher allows us to have an always-on kiosk. We have it locked down so users can only access the pre-approved range of video conferencing solutions along with a browser which we use for training purposes."

Andrew Yardsley
CTO Bishop Fleming

- ⊘ Easy call launching with different video platforms
- ⊘ Locked down kiosk
- ⊘ Standradized experiences
